## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13, drawn to an arrangement comprising a computer system adapted to detect an abnormality or an inconsistency within a subject generating internal impedance data.

Group II, claim(s) 14-68 and 80-90, drawn to an arrangement comprising an electrical stimulator, an analog to digital converter.

Group III, claim(s) 69-70, drawn to an abnormality or inconsistency detection arrangement comprising an analog to digital converter adapted to obtain spectral electrical impedance tomography recordings and current density recordings from a subject.

Group IV, claim(s) 71-79 and 92-95, drawn to a method of and computer system adapted to detect an abnormality or an inconsistency comprising generating internal impedance data indicating an impedance change within a subject, wherein the impedance change is associated with at least one of a change in at least one characteristic of a blood vessel within the subject and a presence of a foreign object within at least one portion of the subject.

Group V, claim(s) 91, drawn to a method of detecting an abnormality or an inconsistency comprising simultaneously obtaining spectral electrical impedance tomography recordings and electroencephalography recordings from a subject.

Group VI, claim(s) 96-99, drawn to a method of detecting an abnormality or an inconsistency, comprising the step of generating internal impedance data over a predetermined range of frequencies, the internal impedance data indicating an impedance change within at least one portion of the subject.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: each group contains subject matter, see above, that is distinct from one another and has separate utility.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
